CELEBRATING 40 YEARS

Changing the
World
One Child at a
Time

An international, nonprofit organization dedicated to helping underserved children around the world secure the medical care they desperately need to live more fulfilling lives.

CELEBRATING 40 YEARS OF HEALING

Healing the Children (HTC) is one of the oldest and largest non-governmental, humanitarian, volunteer driven charities in the nation. HTC partners with American healthcare providers to help underserved children around the world secure urgently needed medical care otherwise unobtainable.

OUR VISION

Healing the Children envisions a world where every child has access to good medical care. We have 15 chapters (serving 19 states) across the US supported by our national office.

Healing the Children is proud to have been helping children access the health care they need and deserve since 1979.

OUR PROGRAMS

MEDICAL TEAMS ABROAD

The **Medical Teams Abroad** (MTA) program works at the invitation of the host country. We assemble a medical team built around the specific pediatric surgical specialty requests. The MTA volunteers work in the local hospitals and clinics along with the local healthcare providers to provide the surgical services otherwise not available there and to train local health care professionals in new medical techniques for sustainability of services.

Surgical Teams include: orthopedic; podiatry; ENT (ear, nose, & throat); cleft lip & palate; burns; urology; oncology; neurosurgery; plastics & reconstruction; and ophthalmology.

NON-SURGICAL TEAMS & SPECIAL PROJECTS

Non-Surgical Teams provide children with access to donated health care and resources. HTC volunteer medical professionals work alongside in-country health care personnel to offer training in best practices to increase their skills and techniques.

Non-Surgical Teams include audiology; dental; dermatology; family medical; educational; pre-surgical screenings; and adaptive equipment.

Special Projects occur both locally and globally to meet the health care needs for children and their families in a holistic approach.

Special Projects include donations of medical equipment and supplies; construction of medical clinics; renovations in hospitals; sponsorships for camp; special awareness events; nutrition support; and water projects.

INTERNATIONAL INBOUND

The **International Inbound** (IIB) program is our founding program. Children from around the world are referred to HTC when it is determined that their serious medical conditions cannot be treated in their home countries. HTC collaborates with international partners, hospitals, doctors, and volunteer host families to bring the children to the US for donated care.

Since most of our children are very poor, we must raise the funds necessary to transport them to the US and provide all medical expenses. Volunteer escorts accompany the children on these flights far from home.

DOMESTIC

Our **Domestic** programs assist children here in the US to acquire medical care, medicines, equipment, and other related needs that fall through the cracks of our existing insurance and social services programs.

INTERNATIONAL MEDICAL ASSISTANCE

The **International Medical Assistance** program (IMAP) is a relatively new program where HTC uses collaborative contacts to help find medical care for an international child in a country closer to where he or she lives. Through IMAP, certified facilities and staff have been identified and the cost of treatment is much lower.
